OPERATIONAL BENEFITS				22

- 1. The 4-way pilot develops maximum shifting force both ways.
- 2. Balanced spool, immune to variations of pressure, also provides high flow.
- 3. Short stroke with high flow.
- 4. Bonded spool with minimum friction, shifting in a glass-like finished bore.
- 5. Pilot with balanced poppet, high flow, short and consistent response times.
- 6. Wiping effect eliminates sticking and contamination.
