

LDA'S COMMITMENT TO WATER QUALITY: EXPANDING FOR INDUSTRIAL WATER TREATMENT PLANTS

LDA is expanding their product range for water treatment plants and related water monitoring and treatment units in industrial companies.

You can find the products [here](#).

MEASURING AND MONITORING INSTRUMENTATION.

Our partner Euroswitch provides high quality analog pressure, level, and temperature sensors and switches. Euroswitch Longvale has these solutions for ATEX environments. Digital sensors and switches are also available through LDA.

Thermoplastic valves & controls for chemical, water, wastewater and ultra-pure liquids.

Plast-O-Matic's complete range of components are the reference on the US market for all applications using chemical, water, wastewater and ultra-pure liquids.

Water/Wastewater Treatment systems rely on Plast-O-Matic products for pump protection and system efficiency, chemical injection, exacting pressure and flow control, air release, degassing and vacuum venting, pulsation dampening, and anti-siphon protection.

Plast-O-Matic valves are designed for the ultimate performance in purity, corrosion resistance, reliability and longevity...four critical factors in any water/wastewater treatment system.

A WIDE RANGE OF FLUID VALVES FOR ALL ENVIRONMENTS

LDA carries a wide range of different fluid valves, to satisfy every need of our customers. For more specific information on fluid valves, [click here](#).

MAINTENANCE SOLUTIONS FOR DRAINAGE PIPES.

Removeable inflatable plugs can be used as a safety precaution for maintenance on piping and drainage systems. Possible applications include waterproof tests, cleaning operations, and leak tightness tests.

Emergency solutions.

Drainage stoppers

Our fixed anti-pollution stoppers work as an environmental protection to contain any accidental pollution. Permanently installed in the upper part of pipes thanks to their patented system, they are easily deployable manually or by remote control, such as any phones or fire alarm systems.

FREE FALL FIRE EXTINGUISHING VALVES

Another emergency drainage stopper, specifically designed for fires, are the free fall fire valves from Landon Kingsway. They provide a compact, leak-proof positive action mechanism that can be installed in either horizontal or vertical pipe runs on oil or any non-aggressive media.

LDA, solutions for life

LDA specializes for over 55 years in industrial automation. LDA provides a wide range of products for pneumatics, electro-mechanical automation, shock absorption, vibration isolation, industrial connection and networking systems in Belgium and Luxembourg. LDA is specialized in niche markets and has the technical expertise to support our customers to excel in their domain, please check out our technical catalogue.
