

LINEAR SLIDES | LAS SERIES

The LAS series is designed based on the LAL series. Stroke up to 150mm, peak force up to approx. 200N.

- ✓ Soft-Land™ capability and precise force control
- ✓ Ideal for precision positioning and handling fragile material/components

NOTE: For any SMAC Moving Coil Actuators, the maximum recommended continuous duty current is 600mA supplied to the actuator over a 1 second period. For anything beyond this in terms of current draw or time please consult the factory. We manufacture actuators to suit our customers' requirements. Please call us if you do not find the right actuator in this list.

Options & Modifications (Consult factory for availability)

- Linear encoder resolutions ----- 5µm standard. 1µm and 0.1µm optional for most units. Consult factory for availability.
- Return spring ----- Prevents the shaft from dropping during vertical operation when power is cut.
- Increase of force & acceleration ----- 48 volt coil and double coil options are available for some units with 24 volt single coil.
- Increase of force accuracy/lifetime ----- Low-friction linear guide/extra-long preload linear guide.
